Varso Tower Observation Deck

A visit to the Varso Tower observation deck – a new attraction offering breathtaking views of Warsaw from 230 meters above ground level. From the rooftop of the tallest building in Poland, the entire city unfolds before your eyes, reaching as far as the distant suburbs. On some days, the deck rises above the clouds hanging over the city.

In addition to the impressive panorama, visitors can enjoy an engaging exhibition presenting selected Warsaw buildings, historical figures, and iconic associations with Poland. The views can be admired from two locations: the 360-degree observation deck at the very top and the green terraces located a few floors below.
